CS&SE Advanced Coursework Programmes
Sem1 2015 Introduction Session

Wei Liu

School of Computer Science & Software Engineering
The University of Western Australia

18th February, 2015
CS&SE Advanced Coursework Programmes 2015

Research Project Coordinator
Wei Liu
(unti 2nd August)
Room 2.18
Ext. 3095
wei.liu@uwa.edu.au

Research Project Coordinator
Tim French
(from 3rd August)
Room 2.14
Ext. 2794
tim.french@uwa.edu.au
This talk will provide details for 2015 on:

- BCompSc/BCM/BSc end-on Honours
- BSc (CompSc) end-on Honours
- BPhil
- BE(SE) 4th year
Overview

The plan for today:

- Enrolments
- Units
- Research projects
- Assessment and penalties
- Timetable
- Administrative arrangements
- Prizes
- Getting the most out of your course
Outline

1. Enrolments and Units
   - End-on Honours
   - Final Year Project BE(SE)

2. Managing Project Year Study

3. Research Projects
   - What is a research project
   - Managing your deadlines
   - Assessment

4. Making the most out of your final year!
Enrolments and Units

Managing Project Year Study

Research Projects

Making the most out of your final year!

End-on Honours

Enrolments for end-on Honours

- Students must complete a research project and four honours-level units
- The research project is worth 24 course credit points
- Units are worth 6 course credit points each
- Aim to do one or two units in Semester 2
- All students must see the project coordinator by Thursday, 26th Feb (by 1pm) to confirm their enrolment
- Discuss enrolment changes with the project coordinator first
Enrolments for end-on Honours

Full-time students starting in Sem 1, 2015 should be enrolled in:

- CITS4001 CS&SE Research Project Part 1
- CITS4002 CS&SE Research Project Part 2
- CITS4008 Scientific Communication (Sem 1)
- exactly **three** “research-group” units chosen from:
  - CITS4402 Computer Vision (Sem 1)
  - CITS4403 Computational Modelling (Sem 1)
  - CITS4404 Artificial Intelligence & Adaptive Systems (Sem 2)
  - CITS4419 Mobile and Wireless Computing (Sem 2)
  - CITS5503 Cloud Computing (Sem 2)
Enrolments and Units

1. Enrolments and Units
   - End-on Honours
   - Final Year Project BE(SE)

2. Managing Project Year Study

3. Research Projects
   - What is a research project
   - Managing your deadlines
   - Assessment

4. Making the most out of your final year!
Enrolments and Units

Final Year Project BE(SE)

Enrolments for Final Year BE(SE)

- Enrolments for the BE(SE) should be straightforward(?!)
  - see the web for details:
  - but individuals will obviously vary to some extent, e.g. depending on past failures, chosen options, etc.

- The research project is worth 12 course credit points

- Units are worth 6 course credit points each

- All students must see the research project coordinator by Thursday, 26\textsuperscript{th} Feb (by 1pm) to confirm their enrolment

- Discuss enrolment changes with the research project coordinator first
Enrolments and Units

Managing Project Year Study

Research Projects

Making the most out of your final year!

Final Year Project BE(SE)

Enrolments for final year BE(SE)

- The “standard” (study guide tailored) 4\textsuperscript{th} year:
  - CITS4201 Software Engineering Project Part 1
  - CITS4202 Software Engineering Project Part 2
  - CITS3401 Data Exploration & Mining (Sem 1)
  - CITS3402 High Performance Computing (Sem 2)
  - CITS5501 Software Testing & Quality Assurance (Sem 1)
  - CITS5502 Software Processes (Sem 2)
  - GENG5005 Project Management and Engineering Practice (Sem1, Sem2)
- \textbf{two} 6-point (constrained) options
  - Consider CITS4008 Scientific Communication as an option
4th year units

- Aim to do no more than two units in the last semester of the research project
- Some 4th year units run very differently to earlier units
  - more research oriented
  - you are expected to take more responsibility for your own learning
  - you may be expected to find more information for yourself or to organise yourselves to a greater extent
  - less structured forms of assessment, e.g. more open-ended problems
ACE is a zero-load unit that covers a number of important aspects of ethical scholarship that the University considers essential for all students to understand.

- All newly enrolled students must complete the unit.

For more information, see:
http://www.ace.uwa.edu.au/
What is a research project

Outline

1. Enrolments and Units
   - End-on Honours
   - Final Year Project BE(SE)

2. Managing Project Year Study

3. Research Projects
   - What is a research project
   - Managing your deadlines
   - Assessment

4. Making the most out of your final year!

CS&SE Advanced Coursework Programmes Sem1 2015 Introduction Session
What is a research project

Research projects

- An introduction to independent study and research
- The project is done individually
  - different students do different projects
- The project is supervised by an academic from CS&SE
  - sometimes jointly
  - sometimes jointly with people from outside the School
- Projects are proposed by members of the School
  - proposals are available on the 4th year web-site
  - or propose your own project!
- CEED projects are linked to industry and involve a summer placement
What is a research project

Research projects

- The project is assessed principally by
  - a literature review (10%)
  - a dissertation (75%),
  - a seminar (10%), and
  - a poster (5%)

- You are expected to meet with your supervisor(s) regularly
  - at least once a fortnight is typical
  - the length of these meetings will vary according to your needs
  - meet with your supervisor(s) even if you have no current problems
Outline

1. Enrolments and Units
   - End-on Honours
   - Final Year Project BE(SE)

2. Managing Project Year Study

3. Research Projects
   - What is a research project
   - Managing your deadlines
   - Assessment

4. Making the most out of your final year!
Managing your deadlines

Research projects – First Semester

1. Choose a project
   - check out the list on the web or propose your own project
   - talk to potential supervisors

2. Submit a proposal
   - by midday Friday of Week 3

3. “Defend” your proposal to your research group
   - in Week 5

4. Do some work

5. Submit a revised proposal and literature review
   - by midday Friday of Week 12
Managing your deadlines

Research projects – Second Semester

1. Do some work
2. Submit a draft dissertation to your supervisor(s)
   - by Midday Friday of Week 8
3. Get some feedback – and listen to it!
4. Submit your final dissertation
   - by Midday Monday of Week 13
5. Produce a poster
   - by Midday Friday of Week 13
6. Give a seminar
   - in Week 13

- Firm dates for deadlines are available on the 4th year web-site
Managing your deadlines

Important dates

<table>
<thead>
<tr>
<th>Semester 1</th>
<th>Semester 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thu, Week 1</td>
<td>Fri, Week 8</td>
</tr>
<tr>
<td>Fri, Week 3</td>
<td>Fri, Week 10</td>
</tr>
<tr>
<td>Week 5</td>
<td>Mon, Week 13</td>

Last confirmation of enrolment date
Project proposal due
Proposal talk presented to research group
Revised project proposal and literature review due
Draft dissertation due
Seminar title and abstract due
Final dissertation due
Poster due
Seminar
Marked dissertation available for collection
Corrected dissertation due

CS&SE Advanced Coursework Programmes Sem1 2015 Introduction Session
Outline

1. Enrolments and Units
   - End-on Honours
   - Final Year Project BE(SE)

2. Managing Project Year Study

3. Research Projects
   - What is a research project
   - Managing your deadlines
   - Assessment

4. Making the most out of your final year!
Assessment and penalties

- Your final mark for the research project unit is comprised of:
  - 10% literature review
  - 75% dissertation
  - 10% seminar
  - 5% poster

- Penalties apply for late or incomplete components:
  - late proposal: withdrawn from 4th project unit
  - late revised proposal: withdrawn from 4th project unit
  - late draft dissertation: -10% per day (or part thereof) late
  - late dissertation: -10% per day (or part thereof) late
  - dissertation over length: -10/75
  - late/incomplete seminar: 0/10
  - late/incomplete poster: 0/5
  - late corrected dissertation: marks withheld
Getting involved in research in the School

- Research into the School is devolved into a number of different research groups consisting of people with similar interests
  - research groups provide valuable knowledge and interaction
  - each student is expected to join a research group
  - you are expected to attend and contribute to all research group meetings
  - speak to your supervisor for more details
- The School runs a series of research seminars throughout the year by our staff, students, and visitors
  - you are expected to attend all seminars
  - the timetable is available on the web: http://web.csse.uwa.edu.au/research/seminars/
  - watching seminars is a good way to learn how to give them
Administrative arrangements

- You will be housed in the Honours/Masters lab:
  - this is **Lab 2.07**
  - the lab contains a number of computers, a printer, and a small photocopier
  - you have exclusive access to this lab, but
  - you need to share the room with all advanced coursework students
  - i.e., you will not have your own personal position/computer
  - the lab is offered on a trial basis, so, make use of the room!
  - we will attempt to support all reasonable requests for quickly reversible changes to the lab

- You can also get access to your research group lab if needed
Administrative arrangements

- You will have access to the School library in Room 1.27
  - make sure to complete the log book when you borrow a book
- You will have the use of the kitchen, fridge, and showers on the ground floor of the CS&SE building
  - do not get caught with food in the labs
- 4th year students share a common mailbox, located just outside the Staff Room on the first floor
  - check it regularly
Show me the money!

- Faculty prize awarded to the best honours student in CS
- School prize awarded to the best poster
- Travel bursaries
  - some supervisors may provide travel bursaries to 4th year students who have a paper accepted at a recognised conference
- WAITTA
  - awards a prize to the best project in IT&T in the state
  - CS&SE research project students have traditionally done very well
- PhD Postgraduate scholarships
  - including top-up scholarships and casual teaching, PhD students can earn over $30,000 per year tax free
Getting the most out of research year

- It can be an extremely tough year
  - work consistently throughout the year, i.e. don’t leave everything to the last minute
  - be organised!
  - this is NOT the time to balance full-time study and part-time employment
- It can be an extremely rewarding year
- It can be an extremely fun year
- Get a true sense of community
- Gives you an introduction to research
- You get out of it what you put into it
- And, you finally get to play for the winning soccer team!
Questions?
